

USMAN ARIF

FULL-STACK DEVELOPER

Lahore, Pakistan | 03364238599 | usman@example.com | <https://www.linkedin.com/in/us-tech-nerd> | <https://github.com/usmanarif-147>

PROFESSIONAL SUMMARY

Software Engineer with 5+ years of experience building scalable Laravel applications and REST APIs. Skilled in full stack development using Laravel, Vue.js, and Livewire, with experience in real-time systems, microservices, payment integrations, automated testing, and cloud deployments. Worked on SaaS, multi-vendor, enterprise, and real-time communication platforms.

PROFESSIONAL EXPERIENCE

JSYS Tech

Aug 2025 – Present

Software Engineer (Full Stack)

- Working on a multi-tenant physiotherapy SaaS platform with real-time chat and WebRTC calling features.
- Developed JWT-authenticated WebSocket chat systems with message reactions, typing indicators, read receipts, and presence tracking.
- Integrated LiveKit for voice/video calling, call recording, and AI-based transcription workflows.
- Built backend services using Laravel and Rust/Axum within a Kafka-driven microservices architecture.
- Wrote Playwright end-to-end tests and contributed to Jenkins CI/CD workflows.

Horizam

Apr 2022 – Jul 2025

Software Engineer (Full Stack)

- Developed scalable Laravel applications and REST APIs for web and mobile platforms.
- Built multi-vendor systems with vendor onboarding, booking management, Stripe Connect payments, and FCM notifications.
- Designed database schemas, implemented Redis caching, and optimized complex SQL queries.
- Migrated legacy CodeIgniter applications to Laravel with complete database redesign.
- Introduced automated testing using Laravel Pest and improved code reliability across projects.

Softenica

Mar 2021 – Jul 2022

Laravel Developer

- Developed backend services and REST APIs for client projects using Laravel.
- Worked on admin panels, authentication systems, and CRUD-based business modules.
- Assisted in database optimization and integration of third-party APIs.
- Collaborated with frontend developers and participated in agile sprint workflows.

KEY PROJECTS

TECHNICAL SKILLS

Databases: PostgreSQL, Redis, MySQL

Testing & Tools: Postman, Jira, Github, Git, Playwrite, PHPUnit, Laravel Pest

DevOps: Jenkins, CI/CD, VPS Deployment, Linux, Docker

Architecture: Event-Driven Systems, Microservices

Backend: Php, REST APIs, Livewire, Laravel

Real-Time: FCM, Kafka, Livekit, WebRTC

Frontend: Websockets, Bootstrap, HTML/CSS, Javascript, Alpine js, Nuxt js, Vue js

EDUCATION

Bachelor of Science in Software Engineering

Feb 2016 – Feb 2021

University of Management and Technology (UMT), Lahore
