

USMAN ARIF

Senior Software Engineer | Full-Stack Laravel Developer

Lahore, Pakistan | +92 336 4238599 | usmanarif.9219@gmail.com | linkedin.com/in/usmanarif | github.com/usmanarif-147

PROFESSIONAL SUMMARY

Senior Software Engineer with 5+ years of experience designing and delivering production-grade Laravel applications, REST APIs, and distributed backend systems. Skilled in full-stack development with Laravel, Vue.js, and Livewire, and in building real-time platforms with WebSockets, WebRTC, Kafka, and microservices. Proven track record across multi-vendor SaaS platforms, payment integrations, automated testing, and cloud deployments, with a focus on scalable architecture and clean, maintainable code.

PROFESSIONAL EXPERIENCE

JSYS Tech Aug 2025 – Present

Software Engineer — Full Stack

- Engineering core features of a multi-tenant physiotherapy SaaS platform with real-time chat and WebRTC voice/video calling.
- Built JWT-authenticated WebSocket chat with message reactions, read receipts, typing indicators, and presence tracking.
- Integrated LiveKit for SFU-based voice/video calls, call recording, and AI-driven transcription workflows.
- Developed backend services across Laravel and Rust/Axum within a Kafka-driven microservices architecture using gRPC for inter-service communication.
- Authored Playwright end-to-end tests and contributed to Jenkins CI/CD pipelines with disciplined Git branching standards.

Horizam 2022 – Aug 2025

Software Engineer — Full Stack

- Designed and shipped scalable Laravel applications and REST APIs powering web and mobile clients in production.
- Architected multi-vendor systems with vendor onboarding, booking management, Stripe Connect split payments, and FCM push notifications.
- Designed normalized database schemas, applied Redis caching strategies, and optimized complex SQL queries for high-traffic endpoints.
- Led migration of legacy CodeIgniter applications to Laravel with full database redesign and modernized architecture.
- Introduced automated testing with Laravel Pest, improving code reliability and release confidence across the team.

Softenica 2021 – 2022

Junior Laravel Developer

- Built backend services and REST APIs for Laravel-based client projects across multiple business domains.
- Developed admin panels, authentication systems, and CRUD modules; integrated third-party APIs into core workflows.
- Contributed to database optimization, query tuning, and agile sprint delivery alongside frontend engineers.

KEY PROJECTS

RehabSuite — Multi-Tenant Physiotherapy SaaS Platform

Designed a production real-time communication layer combining WebSocket chat and WebRTC voice/video calls; event flow handled via Kafka with LiveKit powering SFU streaming and call recording.

Tech: Laravel 12, Rust/Axum, Kafka, LiveKit, PostgreSQL, Docker, Playwright

Autotheory — Multi-Vendor Auto Services Platform

Built a multi-role platform for auto shops featuring vendor onboarding, service bookings, Stripe Connect split payments, Redis caching, and FCM notifications.

Tech: Laravel, Vue.js, Livewire, Stripe Connect, Redis, MySQL, FCM

Workforce & Job Management System

Delivered role-based job and employee management with real-time dashboards, performance tracking, and daily push notifications across the workforce.

Tech: Laravel, Livewire, Filament, Alpine.js, Bootstrap, MySQL, FCM

TECHNICAL SKILLS

Languages & Frameworks: PHP, Laravel, Livewire, Rust, JavaScript, Vue.js, Alpine.js, HTML/CSS, Bootstrap

Backend & APIs: REST APIs, WebSockets, gRPC, Kong Gateway, Postman

Real-Time & Messaging: WebRTC, LiveKit, Kafka, FCM

Architecture: Microservices, Event-Driven Systems, Multi-Tenant SaaS

Databases & Caching: MySQL, PostgreSQL, Redis

DevOps & Infrastructure: Docker, Nginx, Linux, VPS Deployment, CI/CD, Jenkins

Testing & Tools: Laravel Pest, PHPUnit, Playwright, Git, GitHub, Jira

EDUCATION

B.S. in Software Engineering 2016 – 2021

University of Management and Technology (UMT), Lahore
